

**FARMOUT: Duvernay, Alberta**  
**Twp 56, Rge 16 W4M: Section 32**

**Area Highlights:**

- 100% W.I. PNG Surface to base Mannville
- Expiry March 20, 2009
- Seismic available

**Discussion:**

The primary target in the area is for natural gas in the Colony member of the Mannville Group. Natural gas in the Colony is present in offsetting wells including 100/10-29-056-16W4/3, 102/10-28-056-16W4/0 and 100/09-33-056-16W4/5. PEOC has two proprietary 2D seismic lines giving coverage over the north and west halves of the section, the northern line tying the existing well at 100/16-32-056-16W4. The seismic data is available for viewing at Paramount's office.
