

April 28, 2008

Paramount Energy Operating Corporation (PEOC), an aggressive, growth oriented natural resource company have immediate openings for **SENIOR/INTERMEDIATE FACILITIES PROJECT ENGINEERS** to join our Calgary Office.

Your primary responsibilities will involve the design and project management of small and medium-sized facility and pipeline projects. Relevant work experience would include low pressure natural gas gathering system and compression/dehydration design within a winter access only construction window and extensive facility/pipeline consolidation/optimization of legacy assets to increase throughput and/or reduce operating costs. The Senior Engineer position will include supervision of direct reports.

Your B.Sc. in Engineering, APEGGA registration and minimum five years' (Intermediate Engineer) or ten years' (Senior Engineer) experience in the design, construction or operation of conventional oil and gas facilities and pipelines make you an ideal candidate. Working knowledge of applicable Codes and regulations is required. You have a demonstrated ability to manage multiple projects of varying size/complexity utilizing engineering consultants (as required) and are able to work cooperatively with all levels of the organization. Exposure to multi-discipline Development Teams and Production Engineering experience would be an asset. You possess advanced interpersonal skills, are a self starter and thrive in a fast paced, dynamic work environment.

Interested applicants are invited to submit their resume before May 16, 2008 to:
